## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,4,6,7,11,15 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Nagai et al (US 6,786,187). See col. 5, lines 22-55.

Claims 1,4,7,10-12,15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Tamba et al (US 4,762,098). Tamba et al discloses an engine vibration caused by the operation of the engine, the crank arm 29 etc. has stirred lubricating oil in the bottom of the crank chamber 25; resulting in the crank chamber 25 filled with lubricating oil mist. See col. 3, lines 6-9.

### ***Allowable Subject Matter***

Claims 2,3,5,8,9,13,14,17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3747

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference by Lee et al discloses four-stroke engine with an oil spray generating assembly for lubrication.
